ICASA 2019 Online Programme	16th September 2019	

After a successful organization of ICASA 2017 in Cote-d'Ivoire from 4th to 9th December 2017, the convening of the International Conference on AIDS and Sexually Transmitted Infections in Africa (ICASA 2019) in Kigali Rwanda in December 2nd -7th, 2019 represents a tremendous opportunity to highlight the diverse nature of the African region's HIV epidemic and the unique response to it. Gathering in Kigali, we will work together to strengthen our efforts across all regions and around the world, building on the momentum of recent scientific advances and the recommendations from ICASA 2017. The biennial and bilingual International AIDS Conference is the premier gathering for those working in the field of HIV, as well as leaders, people living with HIV and others committed to ending the epidemic. It will be a tremendous opportunity for researchers from around the globe to share the latest scientific advances in the field, learn from one another's expertise, and develop strategies for advancing all facets of our collective efforts to treat, prevent and end AIDS.

ICASA 2019 is expected to convene over 10,000 delegates from nearly 150 countries, including over 200 journalists. The conference will be held from 2nd -7th December 2019 in Kigali. The Society for AIDS in Africa, the organizer of ICASA, with more than 5,000 members in 56 countries, is organizing ICASA 2019 in collaboration with the government of Rwanda, with the strong support of international and local partners. ICASA will be an important opportunity to share the benefits of such partnerships with other countries.

Hosting ICASA 2019 in Kigali will also make it possible for those from across the region to attend the conference and share their successes and challenges on a global level. Africa has one of the largest population living with HIV in the world. ICASA 2019 in Kigali Convention Centre will definitively integrate the emerging infections such as Hepatitis, TB and the NCDs.

We are extremely pleased to partner with the Rwandan Government, and various scientific and community leaders from Rwanda, as well as from Africa and the world at large, with long and impressive histories of leadership on HIV/AIDS. We look forward to a strong global partnership among science, leadership and community in building a conference programme that will speed up the end of the AIDS epidemic and
